

Node.js (?? ??????? ?? ????????? jsonwebtoken)

```
const jwt = require('jsonwebtoken');

const key = "your_secret_key";
const header = {
  "alg": "HS256",
  "typ": "JWT"
};

const payload = {
  "iss": "Your domain",
  "aud": "Your level",
  "iat": Math.floor(Date.now() / 1000),
  "uuid": "Your ID",
  "uip": "Your IP"
};

const token = jwt.sign(payload, key, { algorithm: 'HS256', header: header });
console.log(token);
```
