

POST /v2/charter/pledger

pledger: storePledgerCharter

دنگیم تبث `charter_pledgers` لودج رد هبعش کی یارب ار (Pledger) دیج نماض کی تنیو پدنا نی. دوشیم هداد **201 Created** تیعضو اهنت و دنادرگی م نرب یصاخ رادقم تیقفوم تروص رد.

URL: `/v2/charter/pledger`

Method: POST

Controller: CharterController@storePledgerCharter

Middleware: authWithJwt

Auth: JWT Required

Request Body

Field	Type	Required	Description
branch	integer	yes	نماض هک یاهبعش هسانش دوشیم تبث نآ یارب
colleague_id	integer	yes	نماض راکمه هسانش

Controller Logic

```
public function storePledgerCharter(Request $request)
{
    try {
        $insert = [
            'branch' => $request->get('branch'),
            'colleague_id' => $request->colleague_id,
        ];

        DB::table('charter_pledgers')->insert($insert);

        return response('', 201);
    } catch (Exception $exception) {
        return response()->json([
```

```
        "message" => $exception->getMessage(),
        "trace" => $exception->getTrace()
    ], 400);
}
}
```

Table: charter_pledgers

Column	Type	Description
id	integer	Primary Key (auto-increment)
branch	integer	هبعش هسانش
colleague_id	integer	نماض راکمه هسانش
status	tinyint	لَاع ف رِغ = ۰, لَاع ف = ۱

Success Response

Status: 201 Created
Body: (empty)

Error Response

Status: 400 Bad Request

```
{
  "message": "SQLSTATE[23000]: ...",
  "trace": [...]
}
```

Flowchart

Validate JWT

↓

Read: branch, colleague_id

↓

DB Insert → charter_pledgers

↓

Insert OK?

↓

Yes → return 201

↓

No → return 400 with message + trace
